After a hard day's work

After a hard days work your husband/wife should come home to a steaming hot bath, with a candlelit bathroom, plenty of bubbles and soft fragrances. After bathing him/her, kiss his/her body from head to toe. Dry him/her off and rub his/her body down with scented body massage oil. Proceed to your room and lay him/her on either silk or satin sheets filled with rose petals. And it's a must that you have plenty of candles around the room (scented), and that will lead you to other things! After working up a sweat, and an appetite, he/she will be ready for a nice Italian dinner. I recommend Pasta Florentine and garlic bread with tasty red wine. He/She will enjoy that night. Guaranteed.
